Introduction.

Welcome to AL Minnen. As an established on 2004, **100% Iraqi-owned company**, with a **proven history** of leadership, innovation, ethics, and high quality engineering, construction, and Design – AL Minnen offers you a trusted partner in Iraq's dynamic environment.

By overcoming what seemed impossible, we have grown - since 2004 - into a leading Iraqi private sector company where complementary capabilities in engineering and construction, information Construction, Power & Instrument , and oilfield services **deliver unique synergies.**

As one of the first in a new generation of diversified private sector Iraqi companies, our leadership is providing a model for the private sector in Iraq.

Our Vision

- To be one of the key players and contributors to the building as well as construction in the region, particularly the construction of Modern Iraq,
- To reserve a prominent place among leading construction and engineering companies as the preeminent and sole provider of creative, ambitious, comprehensive, and massive construction solutions and engineering projects,
- To fulfill the requirements of reconstructing civilized societies and build advancements and progress made in different facets of life including, but not limited to, housing, health care, transportation, and recreation. Thus, be committee to the provision of a better life style for Arab nations, and in particular, for the Iraqi people.

Company Equipment.

Excavator / No. (2)	Loader / No. (1)
SUV & Pickup). / No (7).	Concrete mixer trucks (8m3 Cap.) /No. (6).
Well Drilling machine Cap 750m depth /No. (2).	Water tanker cap 16 m3 /No.(2).
Vacuum sewage tanker 14 m3 capacity /No.(2).	Well Drilling machine Cap 150 depth /No. (1)

Company Departments:

Our company is consisting of the following main departments:

1. Document Control:

This department responsible for collecting project information like emails, test reports, submittals, daily reports, logs ... etc. and organized it to get information easily if someone request it and to prepare it to close out documents.

2. Construction:

This department is responsible for providing suitable manpower (Quantity and Quality) and equipments to complete the project without effects on the quality and total duration.

3. QA/QC:

QA/QC department is responsible for finding the best plan to control the quality of the project.

4. Projects Management:

This is the most important department because it is control the duration of the projects by arrange projects items consequently to get shortest duration for the project and find delays if its happened by update schedules from time to time and put the suitable treatment fix this delay without effects on the total duration and quality.

5. Design and Computer:

This department is responsible for design and inserts data by using computer programs like Auto CAD, STAAD III, STAAD Pro, Sewer Cad... for design and P3 and MS project planner for project management.

6. Safety ,HSE and Security:

This department is responsible for providing the suitable tools and equipment to protect labors and give the suitable safety plan. Also, it is responsible for site security.

Safety is always AL Minnen's top priority-a value that is fundamental to our ethics. AL Minnen has earned an industry-leading record of achieving zero lost-time incidents on 85 percent of our projects. Year and year, our safety performance is right at the top of our industry. At AL Minnen, we believe that every accident, and therefore every injury, is preventable, and we embed that philosophy into every project through a combination of technical field procedures and ongoing training programs. Our safety and health approach includes state-of-the-art safety data systems, computer-based training and a behavior-based safety program. Our commitment to zero accidents extends to every aspect of a project, from planning to completion, and from the boardroom to the field crew. We also ask our subcontractors and partners to adopt our commitment to safety and health. The result is exceptional safety performance, even in hazardous work environments, severe weather, and remote locations. Our dedication to safety helps keep workers safe and it also pays off for our customers. Their operating costs go down and productivity goes up because less time is lost to accidents. They also frequently pay less for insurance. We depend in our SAFETY courses and training by the Coastal for safety training, you are kindly requested to check the following link: <http://www.coastal.com>

7. Estimation:

This department is responsible for analysis the BOQ and estimates the costs of the contracts.

8. Procurement:

This department is responsible providing required materials for the work as required by other department.

Work Experience and Photos

S	Type of work	Start	Finish	Clint	Total Budget	Note
